Are those that do not fluctuate during dis-turbed conditions of the money or stock man-kets. First oeed of trust notes (mist mort-gages), well-scured on real estate in the Dis-trict of Columbia, constitute "gilt-edge" in-seatments. They do not depend upon the financial responsibility of individuals or cor-porations to their stability, and are exempt from taxtime as personal property. New York, July 2—Cotton was easy today, although for a time there was a sharp rally on covering. Private dispatches reported severe rainsforms in Georgia, Eastern Mississippi and Alabama, but the news failed to arouse much interest, and selling by spot houses kept the list down. The close was no unchanged to six points lower. Trading appeared to be mainly an effort to even up accounts for over the holidays. the growing importance of New York as a world financial center, and it is reassuring that funds are ample to meet these outside demands and all home requirements.

That large sums are available for investment is indicated by the fact that the \$71,000,000 offering of local municipal bonds was four times over-subscribed and though varying opinions were formed as to the results of the sale, the outcome was considered generally satisfactory under the circumstances.

As to commercial and industrial corporations news is not good news but favorable reports still outnumber those of an opposite character. War emergency business continues a vital factor and both the production and consumption of iron and steel is rapidly expanding while wages in the coke regions are being restored to the former basis.

## WHEN A MAN IS MARRIED

Myra Bests Father-in-law.

Myra gave rather positive evidence last night that she is developing up-to-theminute ideas with reference to the future of her sex. It is wonderful how incidents of little apparent importance in themselves sometimes work great changes in our lives. A few weeks ago Myra joined the Equal Suffrase Club.

Myra and her father and myself had been discussing the children and what we wanted to make of them as they grew up. Edna, who is already past 13, and Meta, two years her junior, were the serious aspects of the discussion.

"I do hope," said father-in-law, "that you, Robert, and you, Myra, will not make the mistake of letting them learn the serious aspects of the discussion.

(Copyright, 1915.) make the mistake of letting them learn a profession which will throw them too much with the public. This modern, money-mad world has gone far from the old-time chivalry with which we used to care for our girls and women. As a re-sult, the finer sensibilities of the sex have almost, if not quite, disappeared. Indeed, we have the forward girl, the woman who thinks she is the equal of and, as the years go by, she

she isn't and cannot be the equal of ter? There is no reason why women man-physically, for instance," blundered father-in-law.

Myra literally glowed with indignation now. She was truly militant. "Father, you're about as old fashioned as can of our modern civilisation? Can't you best fitted?"
